Petition to Oppose A Waste Transfer Station in Rural Orange County

We oppose siting a waste transfer station (WTS) in rural Orange County. Orange County should immediately terminate all work on a WTS on rural west Hwy 54. Instead, we request that the county seek an alternative site in a commercial/ industrial area, close to or in town, near a highway (I-40 or I-85), with water, sewer, and preferably near power lines and rail. Any site selected should be part of a plan to move to a sustainable waste management solution for the long-term. Vendors should be employed to handle the county's needs until an alternative site is selected.
